

## Send Large files from any private or public cloud service

REGISTER FOR A FREE TRIAL

### Large File Sharing features:

- ✔ **Send Large files without limits**  
Send large files from almost any cloud service. Over 50 cloud connectors and growing.
- ✔ **Send files securely**  
Files can be password protected or encrypted with military grade encryption.
- ✔ **Track files**  
Files are audited and Audit reports can be used to provide e-discovery on files shared including local IP address of the shared and remote IP address of the recipient.
- ✔ **Implement Sharing Policies**  
Force the user of time expiry and passwords.
- ✔ **Monitor file sharing**  
Monitor file sharing using the Audit Watch capability. Be informed in real-time.
- ✔ **Choose deployment model**  
Use the SME SaaS service, deploy on IaaS infrastructure or deploy the entire solution on-premise.
- ✔ **Extend file sizes for your default store**  
The SME solution can extend the size of files shared over and above what is supported on the native cloud or data store.
- ✔ **Eliminate Shadow IT and Bring your Own Cloud (BYOC)**  
Enable file sharing and collaboration without employees using risky consumer-grade services
- ✔ **Phone Apps**  
Easy to use phone apps for iOS, Android, Windows Phone and BlackBerry to facilitate on the move file sharing.
- ✔ **Find out more**  
To find out more [contact](#) a sales representative.
