

ADDENDUM No.2

**To Request for Proposals
For
Weber Basin Water Conservancy District**

2017 WBWCD POTABLE WATER SYSTEM MODEL UPDATE PROJECT

23 June 2017

This Request for Proposals (RFP) and associated attachments are hereby revised to include the following changes and clarifications. Consultants submitting proposals for this project shall conform to these revisions.

Elimination of Price Proposals From the Selection Criteria

Pricing information will no longer be considered during the selection of a Consultant for the 2017 WBWCD Potable Water System Model Update Project. Consultants wishing to submit Proposals shall not include any information on pricing or costs in their Proposal. Any mention of “Price Proposal” in the RFP document and Addenda shall be ignored, including Attachment C of the RFP. The Technical Proposal, as outlined in the original RFP document, will now account for 100% of the Proposer’s total score.

The District intends to enter into fee negotiations immediately after the evaluation of Proposals has been completed and a Consultant has been selected. Therefore, Proposers should be prepared to discuss pricing as early as Tuesday, June 27th, 2017.
